We are seeking an experienced IT Systems Engineer to provide technical support for the IT systems in our manufacturing plant located in Kuilis River, Cape Town. The ideal professional should have a strong understanding of the IT systems setup in a manufacturing plant, data flow with PLC systems, and business intelligence tools.

#### **Key Responsibilities:**

- Provide technical support and maintenance for the IT systems in the manufacturing plant, including cameras, phones, printers, and other equipment.
- Collaborate with cross-functional teams to ensure the proper functioning of IT systems and data flow with PLC systems.
- Develop and implement strategies for data management and integration with BI tools.
- Troubleshoot and resolve issues with IT systems, including hardware and software.
- Develop and maintain documentation of IT systems setup, data flow, and maintenance procedures.
- Monitor and optimize IT systems performance, including security, availability, and reliability.
- Networking
- Handle and Solving problems relating to ERP and various other softwares

#### **Requirements:**

- Bachelor's degree in Computer Science, Information Technology, or a related field.
- 3+ years of experience in IT systems support, preferably in a manufacturing environment.
- Strong understanding of IT systems setup in a manufacturing plant, including cameras, phones, printers, and other equipment.
- Experience with PLC systems and data flow.
- Proficiency in business intelligence tools such as Power BI, Tableau, or QlikView.
- Strong problem-solving skills and attention to detail.
- Excellent communication and collaboration skills.
- Ability to work independently and as part of a team.
